

# Model Home News

Look for several model homes to be constructed at Silver Saddle over the coming months. Lots for the homes have already been graded and prepared for building. Plans are approved for a 3,000 square foot plan featuring four bedrooms and three full baths. Additional plans for a 2,200 one-story and a 2,500 square two-story are currently in engineering and particulars are being finalized.

The homes will feature a variety of amenities including tile roofs, indoor sprinkler/fire prevention systems, indoor laundry rooms and more.

We'll keep you posted with pictures and more information as the homes near completion. Stay tuned!
